### all weather blanket

For those days when the weather simply isn't cooperating, don't despair! Woobee has designed an [all-weather blanket](#) to protect your precious one from the rain and wind. With a super-cozy side for comfort and a soft water-resistant fabric on the other, the Woobee blanket keeps your prepared for anything you encounter. With strategically placed ties that secure the Woobee in place, you won't worry about your little one falling prey to the elements. Designed by a smart mother in Seattle, WA who was determined not to let all those rainy days get the best of her outings. Kudos to These Two Girls and we look forward to future products this company will think up!
